

UNITED STATES DEPARTMENT OF AGRICULTURE

SERVICE AND REGULATORY ANNOUNCEMENTS

BUREAU OF ANIMAL INDUSTRY

JUNE 1941

[This publication is issued monthly for the dissemination of information, instructions, rulings, etc., concerning the work of the Bureau of Animal Industry. Free distribution is limited to persons in the service of the Bureau, establishments at which official inspection work is conducted, public officers whose duties make it desirable for them to have such information, and journals especially concerned. Others desiring copies may obtain them from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 5 cents each, or 25 cents a year (foreign, 60 cents). A supply will be sent to each official in charge of a station or branch of the Bureau service, who should promptly distribute copies to members of his force. A file should be kept at each station for reference.]

NOTICES REGARDING MEAT INSPECTION

ANIMAL CASINGS OF FOREIGN ORIGIN

Certificates required by B. A. I. Order 305 and instructions issued thereunder, which bear the official title of the high official of the foreign country as specified below, will be acceptable with animal casings offered for importation into the United States.

The certificates must also bear the signature of the high official of the national government having jurisdiction over the health of animals in the foreign country in which the casings originate, but owing to the fact that the high officials are changed from time to time it is impracticable to publish their names.

<i>Official title</i>	<i>Foreign country</i>
Veterinary Surgeon.....	Iceland.

BACON AND HAM FOR GREAT BRITAIN

The Bureau is officially informed that an order was issued by the British Ministry of Food, effective June 14, 1941, permitting the importation into Great Britain of bacon and ham, free of the obligation imposed by the Merchandise Marks Act, 1926, requiring such products to bear an indication of the country of origin.

The instructions in Service and Regulatory Announcements of June 1934, under the caption "Marking Meat for Great Britain," are hereby revoked.

PURCHASE OF REPRINTS LIMITED TO RESEARCH PAPERS

Authority of the Department of Agriculture to purchase reprints of articles by Department employees published in outside journals is limited to papers of definite technical and scientific nature. In harmony with the understanding reached with the Congressional committee when this authorization was granted the Department, the intent, as officially interpreted, was to limit the articles to those devoted primarily to reporting results of authorized research projects. Such outside articles should supplement rather than conflict with the Department's publications on related subjects. Articles of popular character, those on regulatory subjects, and others which are merely general descriptions of experiment stations and their work, even though containing some results, are not eligible for official purchase in the form of reprints.

Reprints of papers in outside publications are generally purchased in editions of 100 to 200 copies, the former being the preferred number and the latter the maximum (except in very unusual cases of demonstrated need). When larger supplies are required for official purposes, manuscripts should be offered for publication by the Department for issuance in printed, mimeographed, or other suitable form.

This information is furnished employees to avoid needless correspondence and possible embarrassment through obtaining, from publishers, estimates on the cost of reprints which the Department later cannot purchase through lack of authority. In all cases it should be made clear to the publisher that inquiry about the cost of reprints is not a purchase order. If there is doubt about the character of an article or official authority to purchase reprints of it, the Washington office should be consulted preferably in advance of negotiations with the publisher.
